

Outcomes Summary Following RCGP Collaborative Working Programme

Idorsia Pharmaceuticals UK Ltd and Royal College of General Practitioners

Educational e-Learning modules

Under a collaborative working agreement Idorsia Pharmaceuticals Ltd and RCGP have developed educational modules with the aim to deliver an up-to-date GP digital education course via the RCGP Online Learning Platform.

This project, including its implementation, involved the pooling of skills, experience and resources from both Idorsia UK and RCGP for the joint development and implementation of GP medical education. There was a shared commitment to successful delivery from both parties, and each party has made a significant contribution.

This has resulted in:

- 1) Two 30-minute eLearning modules:
 - Module 1: Diagnosis of Chronic Insomnia
 - Module 2: Management/Treatment of Chronic Insomnia
- 2) A 20 minutes consultation microsite on the management/treatment of Chronic Insomnia (four patient case studies)

This insomnia course can be accessed by members of the RCGP as well as non-members after creating an account.
